PROFESSIONAL SUMMARY

Detail-oriented **Data Analyst** with 4+ years of experience at **Amazon Web Services (AWS) Cape Town**, specializing in cloud data pipelines, dashboard automation, and translating complex datasets into business insights. Skilled in SQL, Python, AWS analytics tools, and predictive modeling. Known for improving data accuracy, reducing reporting time, and enabling better decision-making through scalable cloud solutions.

CORE SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn), R
 - **Data Engineering:** SQL, ETL, AWS Glue, Lambda
 - **Cloud & Analytics:** AWS Redshift, S3, Athena, QuickSight
 - **Visualization:** Power BI, Tableau, QuickSight
 - **Machine Learning:** Regression, classification, forecasting
 - **Other:** Git, API integrations, Agile/Scrum
-

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS), Cape Town — Data Analyst

Jan 2021 – Present

- Designed and maintained large-scale **data pipelines** using AWS Glue, Lambda, and S3 to automate ingestion from internal and customer-facing systems.
 - Built **interactive dashboards** using QuickSight, reducing manual reporting time by **60%**.
 - Performed predictive analytics for capacity planning across AWS regions, improving forecasting accuracy by **30%**.
 - Collaborated with engineering teams to optimize Redshift queries, cutting query execution costs by **25%**.
 - Standardized data quality checks, reducing data inconsistencies by **40%**.
 - Led training workshops for teams on SQL optimization and AWS analytics tools.
-

EDUCATION

Bachelor of Science in Data Science

University of Cape Town
2017 – 2020

Certifications

- AWS Certified Data Analytics – Specialty
 - AWS Certified Solutions Architect – Associate
 - Google Data Analytics Certificate
 - Tableau Desktop Specialist
-

PROJECT HIGHLIGHTS

Cloud-Based Customer Churn Prediction Model

Built an ML pipeline on AWS (S3 + Lambda + SageMaker) predicting customer churn with 87% accuracy.

Cost-Optimization Dashboard

Developed a QuickSight dashboard visualizing real-time AWS resource costs, saving the unit ~R500,000 annually.

ETL Pipeline Modernization

Migrated legacy ETL scripts to AWS Glue, improving performance and cutting total runtime from 5 hours to 45 minutes.

TOOLS & TECHNOLOGIES

AWS Suite · Python · SQL · Git · Power BI · QuickSight · Tableau · Airflow · Docker
