Professional Summary

Senior Backend Developer with 6+ years of experience designing, developing, and deploying scalable server-side applications. Expertise in Python and Node.js, relational databases, and cloud platforms (AWS, GCP, Azure). Proven track record of optimizing system performance, ensuring security, and delivering robust API solutions.

Professional Experience

Senior Backend Developer | Tech Innovators Inc. | 2020–Present

- Architected and implemented RESTful APIs supporting high-traffic applications.
- Optimized PostgreSQL and MySQL queries, reducing query time by up to 40%.
- Deployed and maintained backend services on AWS EC2 and Lambda, achieving 99.9% uptime.
- Enforced security best practices including JWT authentication and role-based access control.

Backend Developer | Soft Solutions | 2017–2020

- Developed backend services using Python Flask for enterprise applications.
- Integrated APIs with frontend components, improving system responsiveness.
- Assisted in database schema design and optimized performance-critical queries.

Education

BSc in Computer Science, University of Technology, 2017

Key Skills

Python, Node.js, REST API, PostgreSQL, MySQL, AWS, Docker, System Architecture, Security
